Start of Block: informed_consent

Q1 Informed Consent

Participation is voluntary

It is your choice whether or not to participate in this research. If you choose to participate, you may change your mind and leave the study at any time. Refusal to participate or stopping your participation will involve no penalty or loss of benefits to which you are otherwise entitled.

What is the purpose of this research?

The purpose of this research is to examine human judgments about automated vehicles. All data from this experiment are gathered for scientific purposes and will contribute to our eventual understanding of brain and visual function. These data may be published in scientific journals so that other researchers may have access to these data.

How long will I take part in this research?

Your participation will take approximately 5-10 minutes to complete.

What can I expect if I take part in this research?

As a participant, you will be asked to look at images presented on a video display and give responses with key presses or movements of a mouse pointing device. Your response may involve responding as quickly as you can, memorizing what you saw, making a judgment, or completing a questionnaire. You will also be asked to complete a demographics form.

What are the risks and possible discomforts?

If you choose to participate, the effects should be comparable to those you would experience from viewing a computer monitor for 15 minutes and using a mouse or keyboard, e.g., eye fatigue. You are free to take breaks throughout the session.

Will I be compensated for participating in this research?

You will be compensated \$0.94 for this study. You will still receive payment if you withdraw early.

If I take part in this research, how will my privacy be protected? What happens to the information you collect?

Your participation in this experiment will remain confidential, and your identity will not be stored with your data.

If I have any questions, concerns or complaints about this research study, who can I talk

to?

The researcher for this study is Julian De Freitas who can be reached at 626.559.6401; #161 Morgan Hall, 15 Harvard Way, Boston MA, 02163; jdefreitas@hbs.edu. If you have questions, concerns, or complaints, If you would like to talk to the research team, If you think the research has harmed you, or If you wish to withdraw from the study. This research has been reviewed by the Committee on the Use of Human Subjects in Research at Harvard University. They can be reached at 617-496-2847, 1350 Massachusetts Avenue, Suite 935, Cambridge, MA 02138, or cuhs@harvard.edu for any of the following: If your questions, concerns, or complaints are not being answered by the research team, If you cannot reach the research team, If you want to talk to someone besides the research team, or If you have questions about your rights as a research participant.

☐ I agree (1)

☐ I disagree (2)

Q110 What is your Prolific ID?

Please note that this response should auto-fill with the correct ID.

End of Block: prolific ID

Start of Block: attention_checks

att_1 **This is an attention check.**

John is taller than Paul. Who is shorter?

☐ John (1)

☐ Paul (2)

☐ Neither John nor Paul (3)

☐ Both John and Paul (4)

att_2 **What color is grass? The fresh, uncut grass, not leaves or hay.**

Please make sure to select purple, so that we know you're paying attention.

☐ Green (1)

☐ Purple (2)

End of Block: attention_checks

Start of Block: attention_check_fail

att_fail Unfortunately, you have failed to answer at least one of the attention check questions correctly and have been redirected to the end of the survey.

Please click the button to below to be redirected back to Prolific and register your submission.

End of Block: attention_check_fail

Start of Block: av_general

av_info **Please read the information presented below carefully in order to be able to understand and answer the survey questions**

Below is a table depicting 6 possible types of vehicles. The different types are based on how many driving tasks are controlled by the human driver ('HUMAN') versus the self-driving system ('MACHINE').

In level 1, the human controls all driving tasks, whereas in level 6, the machine controls all driving tasks. The levels in-between differ in which driving tasks are controlled by the human versus the machine.

End of Block: av_general

Start of Block: comp_checks

comp_1 **You were shown a table. What did the table represent?**

- ☐ The number of typical daily tasks controlled by humans vs. machines (1)
 - ☐ Different types of vehicles based on how many driving tasks are controlled by humans vs. machines (2)
 - ☐ Six people's preferences for humans vs. machines (3)
-

comp_2 **What were the values for vehicle type #1 (the one at the top of the table)?**

- ☐ MACHINE, HUMAN, HUMAN, MACHINE (1)
- ☐ HUMAN, MACHINE, MACHINE, HUMAN (2)
- ☐ MACHINE, MACHINE, MACHINE, MACHINE (3)
- ☐ HUMAN, HUMAN, HUMAN, HUMAN (4)

Start of Block: website

weblink Tesla, Inc. is an American multinational automotive and clean energy company that designs and manufactures **automated vehicles** and related products and services.

Their automated vehicle (AV) program is called Tesla Autopilot and the website link for the same is provided below.

Please take a few minutes to explore this link. **Note: Please only explore the page directed by this link. The goal of this survey is to understand consumer perceptions of the specific webpage.**

When you are ready, please click "start timer" then explore the link by clicking "click here".

The next button will appear after 5 minutes at the bottom of the page to give you some time to explore the link. Please pay attention to the website since you will be asked some questions about it.

words_1 Please use the following text box to type any words or phrases you might recall from the website. Please note that the goal of this task is not to test accuracy, so please do your best to recall any words or phrases without referencing the website again

Page Break

level_1 The next question is based on the automation levels that were shown in a table in a previous question. The table is shown again at the bottom of this page for your reference.

On Tesla's Autopilot website, were you able to find the level of automation for Tesla's Autopilot?

Note- the goal of this question is not to test accuracy, so please do not search for this information on other search engines such as Google. Please only refer to your memory of the website link provided in this survey, without looking at the website again.

☐ Yes (1)

☐ No (2)
